[linkedin.co/in/sonwabisemtirara](https://www.linkedin.co/in/sonwabisemtirara) | <https://sonwabise07.github.io/>

A Cum Laude graduate with a Diploma in ICT Business Analysis, proficient at bridging the gap between business objectives and technical implementation. I am skilled in the full project lifecycle, from conducting in-depth stakeholder analysis and gathering system requirements to leading the hands-on development of web and mobile applications. My technical skills include Python, C#, Java, backend SQL databases, and Supabase. I am passionate about leveraging this unique blend of business analysis and software development skills to build solutions that solve real-world problems.

## Projects

### DUT Lost & Found Portal (Web App)

- **Problem:** The university lacked a centralized system for lost and found items, causing stress and financial loss for students who relied on inefficient social media groups.
- **Solution:** Led the development of a user-friendly web application using Python. The platform allows users to report and search for items with detailed descriptions and images, while an admin panel manages the process.
- **Outcome:** Created a structured, transparent system that significantly reduced the time to recover lost items, minimized fraudulent claims, and improved overall student satisfaction.

### Peer Tutoring Platform (Mobile App)

- **Problem:** Students struggled to find qualified academic support, with no formal system to connect them with available peer tutors.
- **Solution:** Led the development of a native Android mobile app using Java. The app features secure user registration, detailed tutor profiles, session booking with MS Teams integration, a rating system, and an AI chatbot.
- **Outcome:** The platform empowers students to get timely academic help while allowing tutors to earn an income, fostering a collaborative learning ecosystem within the university.

### Mr. Onu's Laundromat Booking System (Desktop App)

- **Problem:** A local laundromat's manual, paper-based booking system was inefficient and prone to errors.
- **Solution:** Served as the Business Analyst and Developer, creating a desktop application in C# that allows users to book services and process online payments. Designed the system architecture and engineered the backend SQL database.

- **Outcome:** Delivered a successful prototype that streamlined the laundromat's booking and payment process, demonstrating a viable platform for modernizing their operations.

### **DUT Online Card Acquisition System (System Design & Analysis)**

- **Problem:** Durban University of Technology's (DUT) manual card production process created significant operational obstacles, including "lengthy lines" that negatively impacted over 33,000 students and staff, especially during peak academic periods.
- **Solution:** Acted as a Business Analyst to produce a "detailed analysis and design" for a new online system. This involved identifying key stakeholders, gathering and documenting comprehensive business, functional, and non-functional requirements, and creating system prototypes.
- **Outcome:** Delivered a complete "Requirements Analysis and Design Document" that serves as the official "blueprint" for the system's development. The proposed solution is designed to "minimize the lengthy queues", improve "operational efficiency", and ensure secure handling of personal data in compliance with the POPI Act.

## **Skills**

- **Technical Skills:** C#, SQL, Python, Java, Microsoft Visio, Visual Studio, Firebase, Android Development, Data Management, Database Design.
- **Professional Skills:** Business Process Analysis, System Requirements Gathering, Stakeholder Analysis, Strategic Planning, Project Planning (WBS), Teamwork, Communication, Data Interpretation & Reporting, Financial Analysis.

## **Education**

- **ADVANCED DIPLOMA IN ICT** | DURBAN UNIVERSITY OF TECHNOLOGY | DURBAN (Expected Graduation: May 2026)
- **DIPLOMA IN ICT BUSINESS ANALYSIS (Cum Laude)** | DURBAN UNIVERSITY OF TECHNOLOGY | (Graduated: 2025)

## **CERTIFICATES**

- CISCO- CYBERSECURITY ESSENTIALS

- IBM- INTRODUCTION TO DATA ANALYTICS
- GREAT LEARNING – PROJECT MANAGEMENT
- ASSOCIATE DATA ANALYST - DATACAMP
- SQL ASSOCIATE - DATACAMP
- BUSINESS ANALYSIS INDUSTRY TRAINING (Content: Business Data Analysis, Stakeholder Analysis, Environmental Analysis, Financial Analysis, Strategic Planning)

## Experience

**Student Tutor** | Durban University of Technology | Durban, South Africa | August 2025 – Present

- **Mentor** multiple student development groups, providing strategic guidance on the entire software development lifecycle.
- **Provide** technical expertise on system architecture, including database design, application modelling, and MVC ASP.NET implementation.
- **Guide** teams in prioritizing core application features to ensure the successful delivery of project milestones.
- **Facilitate** group consultations to enhance teamwork, resolve technical roadblocks, and ensure alignment with project documentation.
- **Monitor** project progress against requirements, providing constructive feedback to keep teams on schedule and focused on key deliverables.

## Activities

**Volunteer Member** | IIBA (International Institute of Business Analysis) Durban Chapter
